CLOVERCARE COMMUNITIES

Supported Independent Living

Building homes around people, not people around homes.

NDIS Registered Provider

Supporting participants across South East Melbourne & the Mornington Peninsula

What IS SIL?

Supported Independent Living (SIL) is NDIS funding for people who need regular support or supervision at home.

Support is available 24 hours a day, 7 days a week, with support workers helping you with everyday activities and building your independence.

In a shared living home, participants may share support while working towards their own individual goals and living as independently as possible.

Who is SIL for?

SIL is generally for people with high support needs who require ongoing assistance or supervision at home. Support can be provided in your own home or within one of our CloverCare Communities homes.
It may be suitable if you need:

Active Support

Active disability support for more than 8 hours per day to complete daily activities.

Ongoing Support

Some level of support or supervision for the remaining hours, requiring support across 24 hours a day, 7 days a week.

Our Story

At CloverCare, we believe the best support starts with listening. As an NDIS registered provider, we have seen first hand the difference that consistent, person-centred support can make in helping participants live meaningful and fulfilling lives. This is why we created CloverCare Communities. To build homes where participants feel safe, valued and supported to live life on their own terms.

As we prepared to launch CloverCare Communities, we made a conscious decision not to rush the process. Over the past 12 months, we have taken the time to learn from participants, families, support coordinators, mentors and experienced SIL providers to understand what creates a successful home environment.

The feedback was clear: participants and families value communication, collaboration, engaging staff, meaningful skill development and being involved in decisions that affect their lives. These principles have shaped the CloverCare Communities model from the ground up.

We believe Supported Independent Living is more than providing a house and filling it with support hours. It's about building a home around the people who live there, a place where participants feel safe, valued and proud to call home, while building the skills, confidence and independence to create a future that is meaningful to them.

Building homes around people, not people around homes

Why CloverCare Communities?

Engaging & Empowering Staff

We recruit staff who are proactive, enthusiastic and committed to creating a positive home environment. Our role is to mentor, encourage and support participants—not simply complete tasks for them.

Collaborative Approach

Participants are involved every step of the way—from choosing where they live and who they live with to creating a home that reflects their goals, preferences and lifestyle.

Compatible Housemate Matching

One of the biggest contributors to a successful SIL home is living with the right people. We take the time to carefully match participants based on personalities, interests, goals, routines and support needs.

Goal-Focused Support

Our staff work alongside families, participants, allied health professionals and other members of the care team to help build participant independence through everyday learning, meaningful experiences and progress towards both NDIS and personal goals.

Communication & Accountability

We believe great outcomes come from strong communication. Through regular check-ins, goal tracking, behaviour monitoring and proactive updates, participants, families and support coordinators stay informed every step of the way.

Building Independence

Every journey is unique. For some, CloverCare Communities can be a stepping stone towards greater independence, while for others it can be a place you proudly call home for many years. Whatever your goals our role is to mentor, encourage and support you by building skills, confidence and routines while providing the right level of assistance when needed.

Where you are today.

Communities

Your goals & your future

Goals That Matter

Through our CloverCare Goal Tracking System, we'll work with you and your support team to set meaningful goals, track your progress and celebrate your achievements.

Working Together

We'll work closely with you, your family and your support network to understand your individual needs, routines and preferences, creating consistent support that feels familiar and works for you.

Building Skills Over Time

From cooking and household routines to community participation, employment goals and social connections, you'll be supported to build new skills and confidence at a pace that's right for you

Your CloverCare Journey

1. **Lets Talk**

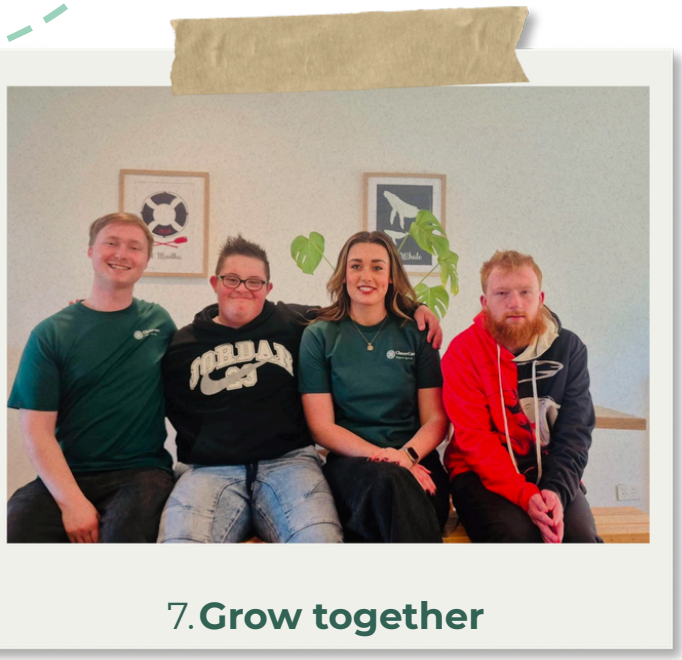

2. **Get to know you**

3. **Find your housemates**

4. **Choose your home**

5. **Make it your own**

6. **Move in**

7. **Grow together**

Understanding SIL: The Practical Details

Rent & Utilities

Rent, utilities, groceries and other everyday living expenses are separate costs. Accommodation and living arrangements are discussed openly with participants and their support networks before moving in.

Support Ratios

Our homes are designed around shared support, with one support worker supporting up to three participants. Support ratios are based on each participant's NDIS-funded SIL plan, with individualised support available where required. Our homes can accommodate support ratios from 1:1 to 1:3.

Funding Levels

For participants living in a CloverCare Communities home with up to 24/7 support, we generally require approximately $200,000 in annual SIL funding per participant.

We also provide individual support in your own home, with support hours tailored to your needs and available NDIS funding.

Roster of Care

A personalised Roster of Care outlines the support each participant requires throughout the day and overnight. This helps ensure funding and staffing are aligned with individual needs and the support provided within the home.
